### PROJECTS

- **Multi-Store**  
A multi vendor e-commerce platform with separate websites for store owners and customers. Owners can make their customers site more attractive because of the dynamic nature implemented on the customers web site. Both are built using React js and backend using Node js.
- **Artify**  
Artify is a React-based application with Node Js serving as its backend. It caters to the needs of artists, providing a platform for them to sell their artwork and connect with fellow artists.
- **Project Hub**  
Project Hub is an application where users can showcase their projects, explore others' projects, and gain inspiration. It's built using React for the frontend and Node.js powers the backend, enabling server-side functionalities such as handling HTTP requests, communicating with the MongoDB database.
